Summary

A Fullstack Developer with a background in building and optimizing web applications. Experienced in developing robust authentication systems, integrating seamless payment gateways, and enhancing system performance. Currently working on n8n engines and MCP servers.

Technical Skills

Languages: C, C++, Java (basic), JavaScript, TypeScript

Frameworks: ReactJS, NodeJS, Redux, PostgreSQL, NextJS

GenAI: OpenAI, Gemini, LangChain

DevOps/Tools: MCP Servers, SDK Development, API Integration

Other Tools: VS Code, Git, GitHub, Postman REST API, TailwindCSS, ShadCN, Replit

Projects

Neuronote AI SAAS (Live App)

AI-driven documentation platform that simplifies PDF summarization & categorization, increasing productivity by 45%. Achieved 60% faster load times and handled real-time updates within 500ms using LangChain prompts with Pro Perplexity & Gemini. Secured with Clerk Auth, deployed on Vercel.

Tech Stack: React, Next.js, TailwindCSS, Supabase, Prisma, Inngest, Clerk, Vercel, Langchain, Gemini Pro

Live Market Data and Hedging Platform

Trading app using Probo & Polymarket APIs. Optimized backend with Bun.js and Polymarket SDKs, ensuring 99.9% reliability while reducing load by 60%. Includes Clerk authentication for secure sessions.

Tech Stack: Bun.js, TypeScript, TailwindCSS, Clerk, Cloudflare Workers, PostgreSQL

Fintech Payment Gateway (GitHub Repo)

Secure platform for instant transfers & wallet management. Integrated UPI-like flow with transaction history and real-time balance updates. Authentication handled with OTP & JWT.

Tech Stack: Next.js, TailwindCSS, Auth, JWT

Education

Maharaja Agrasen Institute of Technology, Rohini

B.Tech in Computer Science and Engineering | Current CGPA: 8.5/10

Coding Profiles

LeetCode & CodeChef: 100 questions solved (total)
